WO 2005/073326 A2

(54) Title: TEMPORARY, WATER-PROOF, CLEAR OR TINTED SYSTEM, METHOD OF USE AND REMOVAL

(57) Abstract: A highly water resistant coating is described for use as a temporary protective or tinting finish for a wide variety of personal items, including one's vehicle and tires. The film forming polymer of the coating is desirable as it can be applied with polar solvent(s) but then upon evaporation of a solubilizing additive becomes water resistant or water proof. Thereafter if a similar solubilizing additive is used in a polar solvent(s), the coating can be removed without damaging the surface of the substrate.
